

## VILLANOVA UNIVERSITY

### DEPARTMENT of ATHLETICS

This past winter at Villanova University, we completed a minor renovation to our softball complex. Villanova was fortunate enough to receive a private donation with the goal of improving the overall appearance of the facility. The goal of this project was to give the complex a “facelift” without having to alter too much of the infrastructure of the venue while also staying within the parameters of the given donation.

One of the priorities of this project was upgrading the seating in our venue. At the time, Villanova only had metal bleachers for fans to sit in. We looked to DreamSeat and their “BleaChair” product to give our softball complex a professional look without hurting our bottom line. Before converting our aluminum bleachers to the “BleaChair” system, our complex was rather dull and uncomfortable for fans watching games for extended periods of time. Now our complex is more professional-looking, fan friendly and more enjoyable to watch games in.

From the design process through installation DreamSeat delivered on everything they promised and we could not be happier with the results. I strongly recommend DreamSeat’s “BleaChair” product to anyone who is looking for a cost effective way to enhance their venue’s seating. We will certainly look to them again in any future upgrades to any of our facilities.
