To whom it may concern,

I would recommend DreamSeat and/or Seating Solutions for any stadium or arena wanting to upgrade their seating. I have ordered two types of seats from them, one for a premium area, and the other for our player/team benches on the field. I have received multiple compliments from our guests about how comfortable the new seats are, and the players absolutely love the new team benches.

While working with Chandler Suprina and Donald Mace, I felt I was a priority throughout the entire process. We had a scheduling crunch near the end of order, and they bent over backwards to make sure everything shipped in time for our first game. It was obvious that they genuinely cared about my satisfaction.

When it came to cost and production time, these guys were significantly lower and faster than the other company we were looking at, which was Hussey seating.

As our organization grows, I am confident I will be working with DreamSeat and/or Seating Solutions for many years to come.
