America's Got Talent

OUR ULTIMATE FLIP UP SYSTEM IS KNOWN THROUGHOUT THE EVENTS INDUSTRY AS THE MOST INNOVATIVE SEATING SYSTEM.

The modular design of the system allows our design team to maximize the amount of seats in a given space by using a single leg seat on a 30" tread deck. This system is fully safety code compliant with a no climb picket rail package. The Ultimate system can be built around existing obstacles and uneven ground using our all-terrain leveling system.

The understructure of the system is manufactured entirely from lightweight but rigid square tube aluminum and braced together using patented locking systems. With virtually no hardware this system erects and dismantles remarkably quickly.

OPTIONS FOR ANY VENUE OR EVENT- INDOORS OR OUT.

There are two styles of decking that can be used on the Ultimate system. The aluminum deck is used for both indoor and outdoor applications. However, should the event require a quieter solution, we provide our phenolic coated plywood deck for noise reduction. This is the only system that you should consider when looking for temporary seating for your event.

Our signature Ultimate flip up seat has been providing comfort and safety for over 10 years. The Ultimate flip up seat has numerous upgrade options including armrests, cup holders, padded seat covers as well as color options.

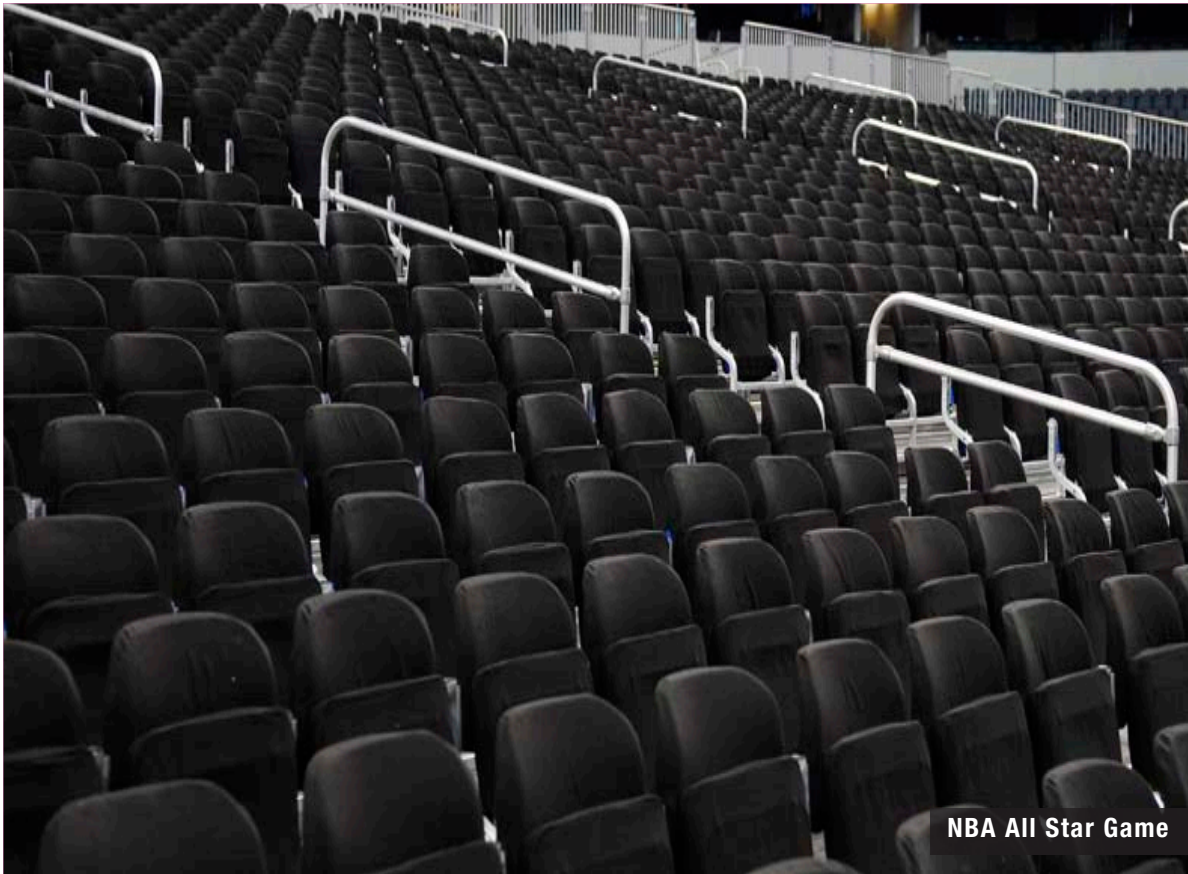

Features include:

- 30" row spacing for added comfort with an option of a 6" or 12" elevation change per row.
- Increased comfort and appearance by use of padded seats covers, carpeting, aisle lighting and scrim
- 20" wide seat over standard 18" chairs
- Option to upgrade to VIP 903 Box Seat and Row One chairs
- Customized drop-in rail signage panels available
